

## **East Side Connector Roadway October 2010 Update**

The Towns of Northbridge, Sutton, and Uxbridge have been working with private land owners to develop a preliminary plan for a connector roadway parallel to Route 146. The roadway will run from Whitins Road/Main Street exit in Northbridge to Lackey Dam Road entrance in Uxbridge.

This roadway will provide access to over a hundred acres of back land and will also provide a safer means of accessing areas that have access now. The eventual construction of the roadway with related water, sewer and perhaps gas infrastructure, will provide for substantial new tax base generation and job creation.

Existing conditions have been thoroughly studied and additional information has been compiled by the Town's consultant. Conceptual layout plans have been prepared. These plans will now be reviewed by the staff of the towns and then brought to a meeting of the landowners and abutters for final input.
