

## **Sutton GIS System October 2010 Update**

The Town of Sutton is utilizing 43D Funding to establish and in house GIS System.

The town participated with the USGS, MassGIS and many towns in the Spring 2009 aerial photography program. We secured flight photography as well as additional information that allows us to have GIS mapping that meets National Map Accuracy Standards.

Through a MACC grant program, we have acquired ArcGIS software to utilize this data.

We are preparing a Request for Proposals to complete topographic and planimetric mapping. The RFP should be released within the month.
