Request to Alter Stonewall at Entrance to Property

To widen and rebuild the stonewall on the right side at the entrance to our property and rebuild the stonewall on the left where stones are falling over.

Highway Department removed a dead tree in February and left a stump. Per the direction of the Highway Department, I was asked to remove the rocks from around the stump area to get the stump grinder in. I had intended to just put the rocks back in place, however, the next paragraph will explain why I would like to alter my entrance.

On March 9th, I requested the Fire Department to come to my home as there was a strong smell of smoke and a haze filling the air. The Briggs Brothers and Officer Dickman arrived. My driveway entrance being so narrow, the Fire Truck could not enter. This has been an eye opener, after 33 years living here to not have emergency vehicles be able to come up my driveway is most concerning.

I want to make a curve in the wall (see between the two cones) approximately 30' in order for Emergency vehicles to enter. I want to keep the stonewall rustic to match my original walls on the property. Nothing fancy at all, just make a curve to widen and put stones back in place on both sides.
