---

Good afternoon Tammy,

Alicia let me know you needed updated drawings for the meeting re: our site waiver. I have attached 2 .pdf documents (couldn't find the old one!). One is the plan from 2023 showing 5 purple 40 foot containers and the 1 construction trailer, and 2 orange 20 foot containers - a total of 8 elements. Then I have attached the 2024 version showing the 3 40 foot containers still in use, and still necessary on the back (west) of the property. That plan also shows a bit shaded out the one remaining 40 foot container near the street that contains all of my personal home items. That container *will be gone by fall* as we have an accepted offer on a home, and hope to have the P&S signed shortly with a closing late July/August.

We cannot empty the 3 containers all of which have items used on a weekly to monthly basis such that off-site storage would be impossible to do for the ministry to function properly. We have begun investigation of the north wetlands area to replicate it elsewhere on our property thus allowing us to build permanent storage in the last remaining possible section of the property. Until that can be vetted, funded, and executed, we are happy to figure out how to paint/cover/fence the one that is viewable from the road for now.

Please let me know what else you need!
