Comments:

Graves Engineering, Inc. (GEI) was on-site to observe installation of the drainage system. This site visit was conducted throughout the entire site. I observed the following:

General Work:

- The contractor continued installing the frame and foundation of Building 3.
- On the southwestern side of Building 3, additional square spaces had been cleared and covered in what appears to be gravel pads for the building columns.
- The contractor was using GPS to mark locations near the driveway entrance leading from the subdivision road to Lots 2 and 3.
- The contractor was excavating earth material near the locations of Drain Manhole (DMH) 603 and DMH 703.

Based upon visual observations only, the work observed today appeared to be consistent with the approved plans.

Action to be Taken:

Client will be notified of this site visit by way of this report.
